TEKNOFLOR®

MAL-GRIT LITE™

The approved scrubbing brush for **TEKNOFLOR® customers.**

Brushes vs. pads

How do cleaning employees choose between floor pads and brushes? Several different considerations are involved, including the nature of the cleaning task and the type of floor surface. For instance, when cleaning uneven surfaces we recommend brushes instead of pads. Brush bristles tend to reach into the peaks and valleys plus difficult areas such as welded seams, while pads tend to ride on the peaks and gloss over the welds.

Return on investment

Cost and durability also must be taken into account when choosing between pads and brushes. "A brush will out last and out perform a pad, "One scrubbing brush might last as long as 100 pads if you take care of it properly."

MAL-GRIT LITE™ brushes offer solutions to a wide range of cleaning situations. Silicone carbide impregnated nylon bristles are self-replenishing as brush wears, That translates directly into time and cost savings. Featuring our water and chemical resistant TUFF-BLOCK® for maximum life expectancy. All Grit Brushes must be run in a wet environment.

Available to fit all types of flooring equipment used today!
